No Soviet motor vehicles or radar sets were seen in the Finowfurt (53/Z 98) Castle or its surroundings.

Comment:

a. The attached photographs, taken by the same source as of a previous report *, again confirm that the finow airfield was occupied by jet aircraft of type 14 (photograph No 2) and jet aircraft of type 16 (photograph No 1). Conventional fighters and conventional training fighters of Yak-11 'yee (photograph 3) are also stationed at the field. The two-seat jet plane of type 16 is used as a training craft. The maker of aircraft of tyle type has increased compared to previous observations by other sources. Only one or two , lanes of this type have been previously seen in Finow. About 45 jet aircraft of type 14 are assumed to be stationed there. The total occupation by jet planes amounts to about 60. The field is assumed to be occupied by two fighter regiments apparently not litirally re-equipped with jet planes.

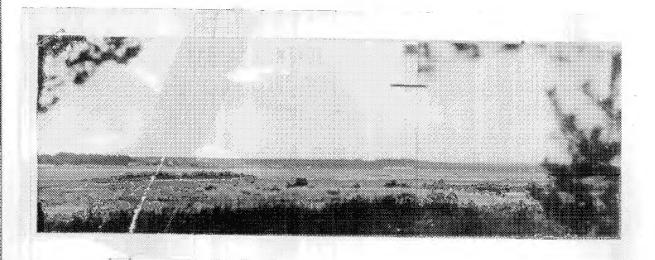

b. The information on an increased take-off speed (para 2) has not been confirmed by other sources.

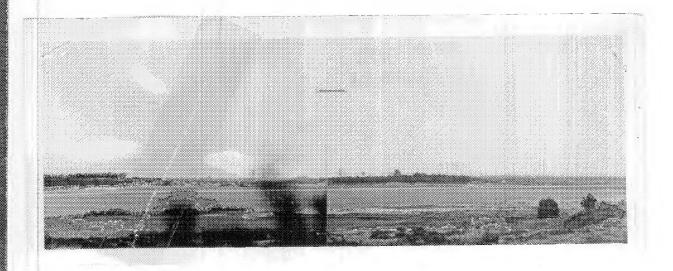

2 racces: Photographs.
